

# HTS Hologram Adhesive Vinyl

## Description HTS Hologram Materials

Heat Transfer Source is proud to introduce HTS Hologram Vinyl materials! These materials are part of the Heat Transfer Source private label line of adhesive vinyl materials. Our HTS Hologram Vinyl creates a prism finish which gives your designs a shiny rainbow effect. With these materials no design is left looking dull. Sparkle and shine only!

## Material Details

- Size 12 x 12 per sheet
- 18 different colors
- Thickness 50-micron PET
- Material outdoor durability is 3 to 5 years
- Material work only on hard surfaces

## Instructions for Application

- Create design and place adhesive color/shiny side up on your mat.
  - Tip- For adhesive vinyl you do not mirror your project.
- Cut design and weed vinyl.
- Prep the surface of your product by spraying with glass cleaner and wiping with a soft cloth.
- Place transfer tape over your vinyl design and smooth with crafting tool scraper.
- Place design and place on your product in the area of choice.
- Press the design on the product and smooth with a tool scraper.
- Once pressed on, peel up the transfer tape leaving the vinyl design on the product.
- **Tip for HTS Hologram Adhesive Vinyl** – Use a hairdryer to remove stubborn bubbles. Adding heat to the design will soften the adhesive.

### Material Recommendations

- Best used for outdoor products; boards, metal signs, decals and works great on tumblers.
- HTS team does not recommended this material for wall application because is a permanent adhesive which can damage paint.

### HTS Recommendation for Project Tools

- HTS Mini Tweedy or Tweedy Lites are a great help with weeding fine lines.
